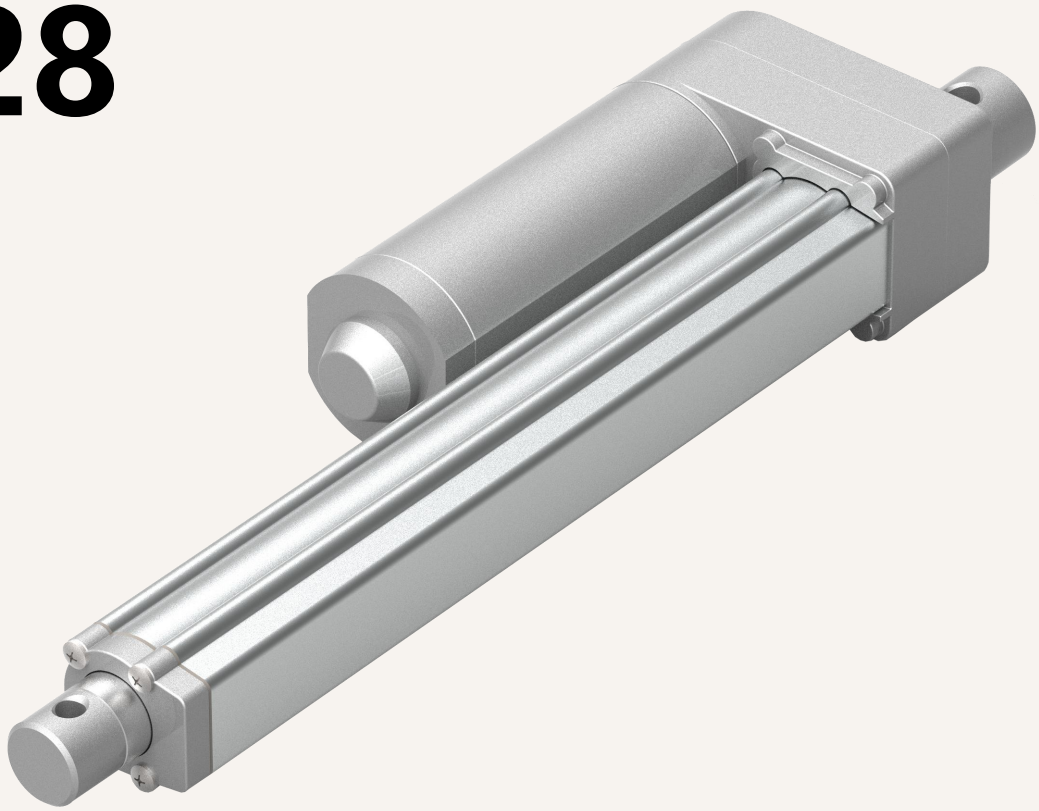
HTA28

Series

Actuator



Product Category

1、Medical

2、furniture

3、Car

Among the many miniature electric linear actuator products, the biggest feature of HTA28 is its low noise and compact installation size, which is especially suitable for installation in X-ray machines or other medical applications. Not only that, it can also be used in furniture or work environments, and can be easily automated through microcomputer control. Actuators used in existing furniture, seats, and various equipment

Functional Overview

Voltage:	12V , 24V DC
Motor Options:	DC Motor
Maximum thrust (pull):	4,500 N / 3,500 N
Slowest speed under load:	5.0mm / s (load 3,500N)
Maximum speed under load:	40 mm / s (load 500N)
Minimum installation size:	Travel + 125mm
Dynamic lateral moment:	30Nm
Static lateral moment:	50Nm
color:	Silver gray, black
Voice:	45~52 DB
Applicable temperature range:	-35°C ~ +65°C
Protection level:	IP67
Screw selection:	Trapezoidal screw
Switch Type:	Built-in limit switch,
Signal options:	Hall sensor, endpoint signal
Control options:	Synchronous control, independent control,
Safety certification:	Comply with ISO9001-2008, CE and RoHS compliant,
High-strength metal zinc alloy gearbox and housing,	

Smart and comfortable move

Maximum utilization of available space The motor system is nicely hidden under the bed.

The system is designed to be placed over the bed for easy cleaning or placement. Innovative solutions

Remark

1. The speed and current on the upper side are the materials that extend when pushed.

2. For 12V motor, the speed is about the same and the current is about 2 times higher.

3. The current & speed in the table are the test average values in the extension direction under thrust application.

4. The current & speed in the table and graph are the test average values of the GeMinG control box configuration, and there is an error of about 10% depending on the control box model.

(The voltage is about 29V DC at no load, and drops to about 24V DC at rated load)

Stroke: minimum value ≥ 20mm, please refer to the table below for the maximum value of load and stroke

Other signal descriptions

Feedback signal	Description	Function
Active endpoint feedback signal	Voltage with this model	When the push rod reaches the end point, a signal will be fed back. This signal will always exist and will disappear during the operation of the push rod.,
Passive endpoint feedback signal	No voltage	When the push rod reaches the end point, it will feedback a signal. This signal always exists when the input power is not turned off. When the input power is turned off, the signal disappears. The signal will also disappear during the operation.

6】Yellow lead: Hall signal output B

Notes:

1) Support dual-channel/single-channel Hall encoder
2) Current-consuming digital output
3) High-speed response frequency from: 0 KHz-100 KHz
4) Applicable temperature range:-40 ℃~+125 ℃
